POWER YOU CAN FEEL. SPORTS CLOTHING FOR HIGH-PERFORMANCE RIDING.

Every time you take to your motorcycle you go one-on-one with the tarmac. You live for every corner and constantly seek the best line, whether on the track or the road. Your equipment must deliver the ultimate in professional performance – and that is just what the Sport helmet and DoubleR leather suit and boots do.

With Rider Equipment sport products from BMW Motorrad, every journey you make is a genuine racing experience.

RIDING ENJOYMENT WITHOUT LIMITS. ENDURO EQUIPMENT FOR ADVENTURERS.

You don't let roads restrict your riding, as you know that when the asphalt ends, the real fun begins. Whatever the surface, your BMW Motorrad Rider Equipment is always up to the job. Light and flexible, it is fitted

with everything an intrepid adventurer could ever need. So get out of the garage and into the great beyond, where nothing, but nothing, can stop you.

WEAR YOUR FREEDOM WITH PRIDE. URBAN CLOTHING FROM BMW MOTORRAD.

Motorcycling is much more than a mere means of transportation. You relish every journey you make, whether zipping along country lanes or making a quick trip into town for a coffee. With BMW Motorrad Rider Equipment, you're

perfectly kitted out for everyday life – both on and off your bike. So take to your machine, open the throttle, and live life the way you want it.

OUR PLAN

YOUR GLOBAL COMPANION. TOURING EQUIPMENT FROM BMW MOTORRAD.

The world is your oyster, with every inch and every corner of every road offering nothing but enjoyment. The longer the journey the better, which is why your BMW Motorrad touring equipment is designed to cope with any weather conditions and any climate you care

to throw at it. Functionality and comfort are the watchwords on every ride. So no matter where you may be in the world, you're always right at home in the saddle.

**BMW MOTORRAD HELMETS AND COMMUNICATION SYSTEMS.
INTELLIGENT DESIGN FOR INTELLIGENT RIDERS.**

PROTECTION IS EVERYTHING.

The ten commandments of good helmet design.

SAFETY

BMW Motorrad helmets meet and in many respects exceed the ECE 22-05 standard. All of them have an expanded polystyrol inner shell of variable thickness, so that each area of the head (chin, forehead, crown, back and cheeks) gets the proper degree of protection.

FIT

The helmets are available in sizes from 48/49 to 64/65, and can be individually adjusted for the perfect fit using cheek and neck pads, which are available in various sizes.

VENTILATION

All BMW Motorrad helmets have a highly effective low-pressure ventilation mechanism. The AirFlow was the first helmet in the world to implement the AirFlow principle, allowing the air to pass through a special mesh and create a pleasant cooling effect.

VERSATILITY

The BMW Motorrad range includes the right helmet for just about every use. For example, the System 6 flip-up helmet, with its built-in sun visor, four-hinge mechanism and preparation for the retrofittable Bluetooth® communication system, is ideal for bikers who place a premium on comfort.

FASTENERS

All BMW Motorrad helmets have an additional neck strap to keep them in place in the event of a crash. They also incorporate a user-friendly ratchet lock or double-D fastener, depending on their use.

COMFORT

Virtually all BMW Motorrad helmets have a removable, washable, breathable and antibacterial liner made from Du Pont Coolmax® or Hydroplus™.

WEIGHT

Every gram of weight saved makes riding that much more enjoyable. Despite its glass fibre shell, built-in sun visor, double-glazed visor and the complex mechanics of the chin section, the System 6 helmet weighs in at just 1,570 grams approximately (size 58/59). The Sport helmet weighs even less at 1,380 grams, and at only a shade over 1,000 grams, the Carbon Enduro is one of the lightest enduro helmets in the world.

AERODYNAMICS AEROACOUSTICS

BMW Motorrad has its own wind tunnel, a luxury other manufacturers can only dream about. This allows us to test every helmet design under real, replicable riding conditions, and then optimize its aerodynamics and aeroacoustics. So as well as their active safety benefits, the helmets are among the quietest in their class.

DESIGN

They're not just safe, they look great too. Each of our helmets is designed to be trendsetting, dynamic and eye-catching.

VISORS

All BMW Motorrad visors feature a high-performance antifog and antiscratch coating, while the System 6, Sport and DoubleR helmets feature a double-glazed visor as standard. As such, they offer an unrivalled level of fogging prevention.

Colour: White Silver Metallic

Exclusive 2 helmet bag

- Robust, waterproof nylon®
- Cushioned lining
- Padded construction
- Extra-long zip
- Two hard-wearing handles
- Colour: Anthracite

System 6 helmet accessories

- Lining, cheek pads and neck pads in various sizes
- BMW Motorrad communication system
- Helmet cleaner
- Visor cleaning cloth
- Visor bag
- Tinted visor* (available March 2011)

Weighing just 1,570 grams, the System 6 helmet is exceptionally comfortable and offers a host of new features. Its four-hinge design means the helmet is particularly compact, even when flipped up, while the steplessly adjustable sun visor allows you to instantly adapt to changing light conditions. Excellent ventilation ensures you keep a cool head at all times, and the double-glazed visor offers incredible clarity of vision. Furthermore, the helmet's aerodynamic and aeroacoustic performance is among the best on the market.

SYSTEM 6 HELMET

- Glass fibre outer shell
- Flip-up chin section with four-hinge mechanism
- Inner shell in two sizes made from multi-segment expanded polystyrol
- Built-in drop-down sun visor, easily operated via slider
- Central button to open chin section
- Chinstrap with ratchet lock
- Double-glazed visor as standard, antiscratch coating on outer face
- Very wide field of vision
- Excellent head and visor ventilation
- Unrivalled aerodynamics and aeroacoustics
- Chinstrap with integrated neck strap for optimum fit
- Removable, washable liner made from Alcantara®, DuPont Coolmax®, and Hydroplus™
- Complies with ECE 22-05
- Compatible with BMW Motorrad communication system
- For details of retrofittable neck and cheek pads and other replacement parts and prices, speak to your BMW Motorrad dealer
- Adjustable chin spoiler
- Sizes: 48/49 – 64/65

CARBON ENDURO HELMET

Exclusive 2 helmet bag

- Robust, waterproof nylon®
- Cushioned lining
- Padded construction
- Extra-long zip
- Two hard-wearing handles
- Colour: Anthracite

The Carbon Enduro is our lightest ever enduro helmet, weighing just 1,110 grams (including sunshield and visor). This is principally down to the use of carbon materials originally developed for the aerospace industry. Combining unparalleled comfort, rider safety, and breathtaking design, the Carbon Enduro helmet offers riders everything they could wish for.

CARBON ENDURO HELMET

- Outer shell made from carbon and Kevlar® laminate
- Three different outer shell sizes
- Five-part expanded polystyrol inner shell for optimum shock absorption
- Alcantara® and DuPont Coolmax® lining
- Removable, washable head and cheek pads
- Detachable chin spoiler for improved ventilation
- Chinstrap with double-D fastener
- Neck straps for secure hold
- Injection-moulded, three-dimensionally curved visor with antiscratch and antifog coating
- Extremely low weight: 1,110 grams, including sunshield and visor (sizes 53/54 and 55/56), 1,210 grams (sizes 57/58 and 59/60), 1,300 grams (sizes 61/62 and 63/64)
- Complies with ECE 22-05
- Sizes: 53/54 – 62/63

Enduro helmet accessories

- Liner and cheek pads in various sizes

BMW MOTORRAD COMMUNICATION SYSTEM.

GET MORE OUT OF MOTORCYCLING.

Motorcycling is all about enjoying the moment – and sharing it. Especially with your riding companion. You also want to be able to listen to your favourite music, take phone calls and get instructions from your navigation system. And with the BMW Motorrad communication system, you can do all that, undisturbed by wind and engine noise, and without ever taking your eyes off the road.

SAFE, PRACTICAL AND HIGHLY USER-FRIENDLY.

The BMW Motorrad communication system features just three buttons – On/Off, Plus and Minus – and these allow users to operate all its functions. This makes it incredibly easy – and therefore – safer to use. The System 5 and 6, Sport and DoubleR helmets are all designed to accommodate the BMW Motorrad communication system, so it can be fitted without affecting their ECE 22-05 certification. Your BMW Motorrad dealer will install the system in your helmet when you buy it, and you can then pair it with your own devices in seconds, whenever you want.

WIRELESS BLUETOOTH COMMUNICATIONS.

The minimal wiring needed for the BMW Motorrad communication systems is built into the System 5, System 6, Sport and DoubleR helmets so that it is completely out of sight. However, for maximum comfort and freedom of movement, all data is transmitted wirelessly via Bluetooth. The BMW Motorrad communication system is compatible with the BMW Motorrad Navigator IV, III, III plus and III plus 2008, the BMW Motorrad ZUMO, and most Bluetooth-enabled mobile phones and MP3 players.

A HIGH-QUALITY USER EXPERIENCE.

With a battery life of 12 hours, the BMW Motorrad communication system is an endurance specialist. It also possesses excellent powers of recovery, with a full battery charge taking approximately just four hours, via either the supplied mains charger or the USB port of your PC. Other benefits include background noise cancellation and speed-dependent volume control, for an excellent-quality, user-friendly audio experience even at high speeds.

A FOUR-WAY CONNECTION.

The rider's helmet (helmet 1) can be simultaneously connected to a navigation system, a mobile phone, a music player, and the passenger's helmet (helmet 2) can be connected to a phone and a music player. The result is a richer, more interactive riding experience.

- Rider and passenger can speak to each other.
- Rider and passenger can each listen to music from a different source.
- Rider and passenger can each receive calls on their own mobile phone.
- The rider can hear prompts from the navigation system.
- A maximum of 2 helmets, 1 navigation device, 2 mobile phones and 2 music players can be used simultaneously.

TECHNICAL DATA

BMW MOTORRAD COMMUNICATION SYSTEM.

Weight	approx. 150 grams
Maximum connections	3 per headset
Range	approx. 10 metres
Range with reduced sound quality	approx. 30–100 metres
Transmitting power	up to 2.5 megawatts
Battery life	approx. 10–12 hours
Waterproof rating	very good/IXP6
Bluetooth standard	2.0
Bluetooth profile	A2DP, headset, handsfree, SPP
Helmet compatibility	System 5, System 6, Sport, DoubleR

**BMW MOTORRAD SUITS.
FOR THE MOTORCYCLING BODY BEAUTIFUL.**

A SECOND SKIN FOR THE DISCERNING RIDER.

BMW Motorrad Rider Equipment materials.

At BMW Motorrad, we use only the finest materials for our Rider Equipment, and are continually developing and sourcing new technologies, so that you can be sure you have the very best that's available.

SCHOELLER® KEPROSHIELD™

This protective composite has been specially designed for motorcycling, and combines a three-layer laminate of Kevlar® (aramid), cotton and polyamide with the c_change™ membrane. The new material mix and the innovative construction have brought about a 20% improvement in abrasion, impact, tear and frictional heat resistance over predecessor products. The reduced weight also further increases rider comfort.

In the natural world::

1 Pine cone closes.

In the membrane:

2 Polymer structure is compressed, providing improved insulation.

3 Combination of heat retention and breathability maximizes wearer comfort.

4 Wind and waterproof.

In the natural world:

1 Pine cone opens up.

In the membrane:

2 Polymer structure opens up and becomes extremely permeable to water vapour.

3 Excess body heat and moisture can be wicked away to the outside.

4 Wind and waterproof.

1 Wind and waterproof.

2 Highly abrasion and tear-resistant.

3 Excellent breathability.

4 c_change™ membrane reacts to changes in temperature and level of exertion.

5 coldblack® technology reflects sunlight.

COOL TECHNOLOGY:

All BMW Motorrad leather suits incorporate the TFL® Cool system. This means that dark leathers reflect the sun's rays in the same way as light-coloured materials, preventing them from getting as hot as they normally would. Tests have shown that in bright sunlight, BMW Motorrad suits are up to 12°C cooler than conventional leather suits. As an added bonus, the technology also significantly slows the garments' ageing process.

C_CHANGE™:

Working in conjunction with Swiss textile specialists Schoeller®, BMW Motorrad has developed a new active membrane: c_change™. It features pores that adapt their size according to the exterior temperature, thereby regulating the breathability of the clothing. The principle is the same as that of a fir cone, which opens its scales in warm weather and closes them when it is cold. This means that c_change™ garments allow the skin to breathe on hot days, and lock in heat when it is cooler. The membrane is also wind and waterproof, and flexible enough to be combined with fully elasticated outer materials for increased comfort.

Infrared photography shows how BMW Motorrad clothing with TFL® Cool technology (1) prevents overheating compared with a conventional leather suit (2), making you more relaxed and alert.

COLDBLACK® TECHNOLOGY

With coldblack® technology, dark textile suits reflect up to 80% of near-infrared sunlight. As a result, the material stays cooler for longer, and rider comfort is greatly increased.

STREETGUARD 3 SUIT

The exclusive use of Schoeller® Keproshield™ three-layer laminate – featuring Kevlar® (aramid), cotton and polyamide in conjunction with the c_change™ membrane – makes the Streetguard 3 suit an unbeatable all-rounder. It outperforms its predecessor by around 20% in the key areas of abrasion, tear, impact, and frictional heat resistance, and is the ideal attire for every ride, whatever the weather.

STREETGUARD 3 SUIT

- Black Keproshield™ and Dynatec™ outer materials featuring coldblack® technology
- Windproof, waterproof and highly breathable due to intelligent c_change™ membrane
- Softshell material in pockets and inside of cuffs
- Removable NP protectors for back, shoulders, elbows, hips and knees (three height positions)
- Zipped protector pocket for back protector
- Can be retrofitted with coccyx protector
- Waterproof, windproof and UV-resistant Storm® zip on jacket
- High-quality waterproof AQUAzip® fasteners on exterior pockets
- Reflective material on the front, back and trouser legs
- Removable wind and waterproof storm collar
- Waterproof ventilation zips
- Removable 3M Thinsulate™ thermal lining
- High trouser waist with fleece lining
- Radiation-shielded, waterproof mobile phone pocket, and two waterproof inner pockets in the jacket
- Connector zip in two lengths
- Colours: jacket – Black, Black/Grey/Orange; trousers – Black
- Sizes (women): 36–46/72–88/18–22
- Sizes (men): 46–66/98–118/25–32

INNOVATIVE COLDBLACK® TECHNOLOGY

Without coldblack® technology

This innovative surface coating reflects up to 80% of the sunlight striking dark materials. As a result, the outer material does not heat up as much, meaning the rider remains comfortable, and therefore more alert.

With coldblack® technology

COMFORTSHELL SUIT

COMFORTSHELL SUIT

- Abrasion-resistant, elasticated Dynatec™ three-layer laminate
- c_change™ climate membrane (breathable, windproof and waterproof)
- Removable NP protectors for shoulders, elbows, back, hips and knees (two height positions)
- Reflective areas
- Ventilation zips at front and back
- Waterproof exterior pockets on the jacket and trousers, and waterproof inner pocket in the jacket
- Connector zip (40 cm)
- Colours: jacket – Black, Blue, Red
- Trousers – Black
- Sizes (women): 34–46 (all colours) and 17–22 (Blue and Black only)
- Sizes (men): 46–60 (all colours) and 98–110 (Blue and Black only)

A sporty, waterproof touring suit for the summer, the ComfortShell's unique c_change™ membrane and elasticated outer layer keep the rider cool and comfortable at all times. It also features BMW Motorrad's NP protectors, which set new standards in motorcycling safety.

TOURANCE 2 SUIT

- Abrasion-resistant Dynatec™ with a highly breathable coating
- Material doubled in vulnerable areas
- Removable NP protectors for back, shoulders, hips and knees (two height positions)
- Breathable, wind and waterproof C.A.R.E. climate membrane
- Zipped openings on jacket and trousers provide indirect ventilation
- Jacket features a removable thermal insert
- Large reflective panels on front and back, reflective wedges on trouser seams
- Adjustable sleeve and waist width
- Fleece inner collar
- Stretch inserts in jacket and trousers
- Connector zip (40 cm)
- Waterproof outside pocket at front
- Detachable braces
- Colours: jacket – Navy Blue, Red; trousers – Black
- Sizes (unisex): XS–XXXL

CoverAll SUIT

- One-piece suit
- Three-layer laminate with breathable water and windproof Cordura® 500 outer material
- Breathable, wind and waterproof C.A.R.E. climate membrane
- Mesh lining for inner pockets
- Removable SC protectors for shoulders, elbows, hips and knees (two height positions)
- NP ProAir back protector can be retrofitted in back protector pocket
- Welded protector pockets
- 3M® reflective print on shoulders and back
- Water and windproof Storm® zips
- Long front zip and two leg zips for convenience
- Adjustable waist
- One waterproof exterior chest pocket, one interior chest pocket, one sleeve pocket on the right forearm, and two trouser pockets
- Colour: Black
- Sizes (unisex): XS–XXXL

AirFlow SUIT

The AirFlow suit is perfect for keeping cool when the temperature rises. The Black version features intelligent coldblack® technology, which prevents the material overheating, while the Silver version features a NanoSphere® coating to prevent the accumulation of dirt.

AirFlow SUIT

- Summer suit
- Stretch material
- Abrasion-resistant Dynatec™ outer
- Black suit features coldblack® technology
- Silver suit features NanoSphere® technology
- AirTex™ mesh spacer fabric for excellent air circulation
- Removable NP protectors for shoulders, elbows, hips and knees (three height positions)
- NP ProAir back protector with multiple ventilation inlets maximizes air circulation
- Zipped protector pocket for back protector
- 3M® reflective strips on jacket and trousers
- Two built-in carrying straps allow jacket to be worn on back like a rucksack when not in use.
- Steplessly adjustable trouser waist
- Jacket: two exterior pockets, one radiation-shielded mobile phone pocket, two inner pockets and one large zipped pocket in lower back area
- Trousers: two zipped pockets
- Waterproof pouch pocket
- All-around zip
- Connector zip (40 cm)
- Colours: Black, Silver
- Sizes (women): 34–46
- Sizes (men):
Black 46–66/98–118,
Silver 46–60

TRAILGUARD SUIT

This suit is ideal for touring and combines freedom of movement, versatility and functionality in a way that only a true all-rounder can. It features the finest materials and is fully adjustable, making it the perfect motorcycling companion all year round.

TRAILGUARD SUIT

- Ideal for touring
- Sporty, dynamic design
- Schoeller® Dynatec™ outer material
- Dynatec™ and Cordura® Stretch offer maximum freedom of movement when riding
- Built-in mesh lining regulates body temperature
- Large 3M® reflective panels
- Removable NP protectors for back, shoulders, elbows, hips and knees (three height positions)
- Sealed windproof zips
- Retrofittable c_change™ insert
- Adjustable belt and Velcro strips on jacket waist, trouser waist, collar and ankles
- Width-adjustable at wrists
- Wide variety of pockets (some waterproof)
- Connector zip (40 cm)
- Colours: jacket – Black/Silver, Mocha/Chalk; trousers – Black, Mocha
- Sizes (women): 34–46
- Sizes (men):
Black 46–66, 98–118, 25–32
Mocha 46–60

RALLYE 3 SUIT

RALLYE 3 SUIT

- Specially developed for off-road use
- Outer made of Cordura® that has been specially treated by BMW Motorrad
- Jacket sleeves are detachable
- Trousers feature stretch inserts and leather trims
- Reinforced in vulnerable areas
- With removable NP protectors (height-adjustable at knee)
- Stretchable, breathable mesh lining
- Ventilated in various places
- Fully adjustable
- Breathable, wind and waterproof C.A.R.E. climate membrane
- Reflective panels
- Backpack for TrinkPak drinking system
- Two waterproof outer pockets on the jacket
- Connector zip (40 cm)
- Colours and sizes: Black/Gun (46–66, 98–118), Grey/Blue (46–60)

On or off-road, nothing can stop the Rallye 3 suit. It incorporates a variety of practical pockets and offers incredible protection, while being extremely comfortable to wear and featuring eye-catching design. As such, it is a must for enduro riders who refuse to let the weather spoil their fun.

ATLANTIS 4 SUIT

The clothes we love most are the ones that have been round the block a few times. The Atlantis 4 is an elegantly dynamic new interpretation of a classic design. The fast-drying nubuck cowhide is sealed with taped seams and rubber-lined zip fasteners so that you can stay dry for several hours on end without any rain overgarments. For maximum comfort, the suit is breathable and incorporates stretch zones, while safety is enhanced by removable NP protectors for the shoulders, elbows, back, hips and knees.

ATLANTIS 4 SUIT

- All-weather touring suit in hydrophobic 1.2–1.4-mm nubuck cowhide
- Naturally breathable leather regulates body temperature and moisture extremely effectively
- Removable NP protectors for shoulders, back, hips and knees (two height positions), coccyx protector can be retrofitted
- Reflective strips on shoulders
- Adjustable sleeves, waist and trouser cuffs
- All-around connector zip at waist for joining the two halves of the suit together
- Stretch zones for enhanced comfort
- Colour: Anthracite
- Sizes (women): 36–46
Sizes (men): 44–66, 98–118, 25–32

HYDROPHOBIC LEATHER

A treatment which renders leather water-resistant. BMW uses the vat immersion technique, with 3M Scotchguard™ as the active agent. The best results are obtained when only the leather fibres are encapsulated and the pores are left open, thereby maintaining breathability.

DoubleR SUIT

The one-piece DoubleR racing suit is up to the toughest sporting challenges, whether on the road or the racetrack. Features such as abrasion-resistant kangaroo leather, high-quality NP protectors, sturdy knee abrasion protectors and a built-in back hump deliver functionality and comfort on every ride and in every manoeuvre. And thanks to a small zip fastener on the back hump, the Neck Brace System can be incorporated seamlessly into the suit in seconds.

For full product information, see “DoubleR suit” section on following page.

DoubleR SUIT

- Skin-tight one-piece racing suit, BMW Motorrad Motorsport design
- Highly abrasion-resistant kangaroo leather, approx. 1.0 mm thick
- Large Dynatec™ stretch inserts
- Stretch leather
- Black leather with TFL® Cool technology
- NP protectors in shoulders, elbows, hips, knees and back
- Hump and zip fastening for fitting of BMW Motorrad Neck Brace System
- Perforated areas on chest, back and arms to keep body cool
- Includes windblocking undershirt and high-quality suit bag
- Plastic-covered stainless-steel abrasion protectors on shoulders and elbows, hard plastic abrasion protectors on knees
- Colours, DoubleR Blue: Blue/White/Red
- Colours, DoubleR Black: Black/White/Red
- Sizes: 46–56, 98–110

This complete package includes an undershirt for riding at lower temperatures, and a practical suit bag with viewing window and carry straps for storage.

The undershirt (sizes S–XXL) features windblocking material at the front for cooler weather.

SPORT SUIT

- Two-piece suit in abrasion-resistant nappa cowhide
- NP protectors for shoulders, elbows, back, hips, coccyx and knees stitched in
- Double stitching throughout, flat stitching in vulnerable areas
- Stainless steel abrasion protectors on shoulders and elbows
- Removable plastic abrasion protectors with leather covers on knees
- Spare plastic abrasion protectors also available (as a pair)
- Leather stretch inserts ensure maximum comfort
- Bent sleeves and knees ensure good riding posture
- All-around connector zip at waist for joining jacket and trousers
- Colour: Black/White
- Sizes (men): 46–60, 98–110

At last, a suit that's as dynamic as your riding style. NP protectors for the shoulders, elbows, back, hips, coccyx and knees offer the level of protection you'd expect from BMW Motorrad. Across the shoulders, the 1.2-millimetre nappa cowhide is further reinforced with stainless-steel abrasion protectors, while the knees feature plastic abrasion protectors, and impact absorbers are built into the collarbone area. Perforated leather on the chest and back and TFL® Cool technology ensure the rider does not overheat when the ambient temperature rises.

**JACKETS AND TROUSERS.
WITH YOU FOR THE LONG HAUL.**

NewCity JACKET

- Cordura® 500 with breathable coating
- Breathable, wind and waterproof thanks to lining laminate with C.A.R.E. climate membrane
- Thermal lining attaches via zip
- Removable NP protectors at shoulders and elbows
- Pocket for removable NP back protector
- Reflective material on back and both sleeves
- Width-adjustable at collar, waist, hips and wrists
- Four exterior pockets and one waterproof interior pocket
- Connector zip (40 cm)

- Ultra-lightweight SC protectors for shoulders and elbows, NP ProAir back protector can be retrofitted
- Slim, masculine cut
- Four exterior pockets, plus two zipped inside pockets
- Lined throughout
- Connector zip (40 cm)
- Colour: Black/White
- Sizes: S – XXXL

SUMMER 2 TROUSERS

- Abrasion-resistant Dynatec™ with breathable coating
- Removable NP protectors at knees (two height positions) and hips
- Removable lower legs
- Adjustable at waist and ankles
- Five pockets
- Connector zip (40 cm), compatible with all BMW Motorrad jackets
- Belt with practical clip fastener
- Colours: Khaki, Black
- Sizes (unisex): XS–XXXL

CITY 2 DENIM TROUSERS

- Lightweight motorcycling trousers in a blue-jeans look
- Made from a highly abrasion-resistant combination of cotton and Cordura®
- Gradually acquires the faded look typical of denim jeans
- Removable NP protectors for knees (two height positions)
- Belt included
- Connector zip (40 cm), compatible with all BMW Motorrad jackets
- Adjustable cuff
- Colour: Indigo (slightly washed-out look)
- Sizes (unisex): XS–XXXL

CITY 2 TROUSERS

- Summer-weight motorcycling trousers
- Made from a highly abrasion-resistant combination of cotton and Cordura®
- Removable NP protectors for knees (two height positions)
- Four zip pockets
- Belt included
- Connector zip (40 cm), compatible with all BMW Motorrad jackets
- Adjustable cuffs
- Colour: Gun
- Sizes (unisex): XS–XXL

CROSS TROUSERS

- Hard-wearing trousers for off-road use
- Abrasion-resistant, breathable material combination
- Lightweight mesh with protector pockets for hips and coccyx
- Polyurethane knee protectors on front of knee, leather trim at back
- Stretch zones for greater comfort and freedom of movement
- Fit tailored to accommodate protectors and leg braces
- Colour: Grey/Blue with Red highlights
- Sizes (men): S–XXXL

**BMW MOTORRAD BOOTS.
GOOD TO GO. FOR THOUSANDS AND THOUSANDS OF MILES.**

SECURITY EVO G3 BOOT

- Racing boot with safety shell technology
- Removable inner
- Inner and outer boot also available separately
- Replacement sliders (including reinforced version) available separately
- Colour: Black/White
- Sizes: 37 – 48

Inner:

- Rigid aramid shell
- Four-layer shin protector
- Impact-absorbing insert in calf and heel areas
- Sturdy hinged shaft mechanism
- Aramid stretch zone for freedom of movement
- Anatomically formed spherical heel bed
- Three-layer aramid webbing in the vulnerable toe area

Outer:

- Hard-wearing kangaroo leather
- Polyurethane-reinforced gear-shift area
- Special non-slip racing sole with rounded recessed edges
- Embroidered “BMW Motorrad” lettering

Hard shell, soft core.

The Security Evo G3 is not one boot, but two. And the result is twice the safety. The inner has a hard aramid shell for maximum stability and protection against pressure and impact forces, while the outer is made of kangaroo leather – a material that offers better abrasion protection than cowhide of the same thickness. Another benefit of the two-part construction is that it makes the Security Evo G3 easier to repair in the event of an accident. And this sports boot is also more than equal to the demands of track riding.

- A high-quality boot for racing use
- Special synthetic leather upper, 1.6 mm thick, perforated in places
- Perforated, breathable lining
- TCS system® keeps position of foot stable
- Removable side, calf and heel abrasion protectors
- Anatomically shaped shin protector
- Abrasion-resistant sole
- Zip fastening and large Velcro panel for easy on/off
- Interior lacing system for optimum fit
- Colour: White/Black
- Sizes: 39 – 49

TCS® TORSION CONTROL SYSTEM®:

This system consists of two heel pieces and a two-part frame. The plastic cuff protects and stabilizes the foot and largely prevents the ankle from twisting or extending beyond its natural range of motion, significantly reducing the risk of injuries. For maximum comfort, the individual components of the frame can move in relation to one another, and so it does not unnecessarily restrict the foot's freedom of movement.

* A patent for TCS® is held by Navigation Motorbike Spa.

COMFORT AND PROTECTION:

TCS® and MCS® allow the foot to tilt from side to side (left-hand illustration) and forwards and backwards (right-hand illustration) under normal conditions, but minimize the risk of injury when the foot is subjected to extreme pressures.

MCS® METATARSAL CONTROL SYSTEM:

MCS® was designed to prevent injuries to the metatarsal bones. The system consists of a rigid polyamide base with a rotation point level with the ankle joint, which controls the up and down movement of the foot, and prevents excessive pressure from being exerted on the metatarsals. The positioning of the rotation point maximizes freedom of movement and ensures a feeling of control when making gear changes. A special high-strength steel is used for the side abrasion protectors. Air vents prevent these from over-heating when scraping on the ground, and channel cool air to the sole via built-in ventilation channels.

The double heel-piece is reinforced with carbon.

Plastic frame with moving parts

RALLYE GS PRO BOOT

- A high-quality enduro boot
- Full-grain cowhide upper
- Removable, stretchable neoprene inner
- Removable, washable insole
- Shaft is wide enough to accommodate a leg brace
- Jointed shaft
- Easy front-closing mechanism
- Colour: Black/Gun
- Sizes (men): 41 – 48

AirFlow 3 BOOT

- Textile/leather upper
- AirTex® webbing panels
- Reinforced shin and ankle areas
- Reinforced heel and toe cap
- Reflective strip on heel
- Removable, anatomically shaped insole
- Shaft length approx. 20 cm
- Colour: Black
- Sizes: 36 – 48

SANTIAGO BOOT

- 2.3–2.5-mm tough hydrophobic cowhide
- Wind and waterproof GORE-TEX® membrane
- 100% Kevlar® inserts
- Removable insole
- Quick aluminium fasteners* with memory effect
- Stainless steel toes with logo*
- Colour: Black
- Sizes: 38 – 47
- * Available as replacement parts

ALLROUND BOOT

- Made from approx. 1.8-mm leather and Cordura®
- Watertight, breathable GORE-TEX® membrane
- Reflective material on heel
- Shin and ankle areas reinforced with anatomically formed plastic and foam
- Reinforced ankle and toecap
- Colour: Black
- Sizes: 35 – 48

PRO TOURING 2 BOOT

New

- Full-grain hydrophobic soft approx. 1.8–2.0-mm cowhide
- Highly breathable, wind and waterproof GORE-TEX® membrane
- Large shin protector, with additional stiffening and foam padding
- Reinforced in gear-shift area
- Soft velour lining around opening
- Washable, anatomically formed insole with antibacterial function
- Flex zones at heel and instep
- Abrasion-resistant heel protector
- Colour: Black
- Sizes: 39–48

CITY BOOT

- A lightweight leather boot designed for urban wear
- Leather lining and insole
- Rubber outsole with leather insert
- Elasticated area around shaft and zip fastening
- Lightweight ankle protection
- Lightweight reinforcements to shaft
- Colour: Black
- Sizes: 38 – 47

SneakerX

New

- Ankle-height sneaker for motorcycling and leisure wear, lightweight and breathable
- Leather/fabric mix
- Breathable lining
- Removable, washable insole with antibacterial surface, underside structured for improved air circulation
- Reinforced in gear-shift area
- Slightly reinforced at ankle and toecap, with stronger reinforcement at heel
- Colour: Black
- Sizes: 35 – 48

**BMW MOTORRAD GLOVES.
FOR CONTROL RIGHT DOWN TO YOUR FINGERTIPS.**

DoubleR GLOVE

- A hard-wearing yet flexible sports glove
- 100% kangaroo leather
- Tough doubled stingray leather on palm, with Kevlar® underlay
- Kevlar®/carbon shell on knuckles
- Plastic shell on wrist
- Impact-absorbing Suprotec® foam on back of hand, thickness varies by area/function
- Stretch inserts for a more comfortable fit
- Colours: Blue/White/Red, Black
- Sizes: 6½ – 12½

ATLANTIS 3 GLOVE

- Back: soft suede/nubuck, palm: smooth cowhide
- Breathable, wind and waterproof GORE-TEX® X-TRAFIT™
- Doubled cuff, with soft shell featuring a GORE-TEX® X-TRAFIT™ membrane inside, and hydrophobic leather outside
- Kangaroo leather tips on middle and index fingers for better grip
- Rubber visor wiper on left index finger
- Leather doubling in vulnerable areas
- Backs padded with Suprotec® foam
- Special stitching ensures no pressure points on fingers
- Colour: Anthracite
- Sizes: 6/6½ – 12/12½

New

CROSS GLOVE

- Specifically designed for off-road use
- Combination of fabric and Clarino®
- Ventilation holes and silicone coating on palm
- Elasticated back for freedom of movement
- Gel pads on palm and thumb area
- Knuckle and finger pads
- Sizes: S – XXXL

RALLYE 3 GLOVE

- An unlined summer glove specifically designed for off-road riding
- Back of hand features a stretchable combination of materials
- Hard-wearing kangaroo leather palm
- Protectors and foam padding on back of hand
- SuperFabric® in vulnerable areas
- Ventilation between fingers
- Short neoprene cuff with Velcro fastening
- Colours: Black/Gun, Grey/Blue
- Sizes: 6/6½ – 12/12½

ALLROUND 2 GLOVE

- A waterproof touring glove
- Leather/textile outer
- Wind and waterproof C.A.R.E. climate membrane
- Leather fingers
- Cordura® knuckles with Suprotec® foam underlay
- Doubled leather in vulnerable areas of the palm
- Ball of thumb reinforced with Keprontec®
- Rubber visor wiper on forefinger
- Light quilting
- Long reflective strips
- "BMW" lettering on Velcro fastener
- Colour: Black
- Sizes: 6/6½ – 12/12½

PRO WINTER 2 GLOVE

- A winter glove with excellent thermal insulation
- Palm made from hydrophobic goat leather, doubled in some areas
- Silicone coating on palm, knuckles and fingertips
- Highly breathable, wind and waterproof GORE-TEX® membrane
- Soft, insulating microfibre lining plus an aluminium layer
- Finger curved forwards for optimum fit
- Long cuff
- Large reflective strip
- Visor wiper on the thumb
- Colour: Black
- Sizes: 6/6½ – 12/12½

PRO SPORT 2 GLOVE

- A lightweight sport glove
- Tough 0.7–0.8-mm cowhide
- Toughened shell with protective foam underlay
- Protective foam and doubled leather on unlined palm
- Cuff with protector, padding and reflective strips
- Perforations between fingers for ventilation
- Colour: Black with Grey palm
- Sizes: 6/6½–12/12½

PRO SUMMER GLOVE

- A lightweight touring glove
- Combination of fabric and goat leather
- Highly breathable, wind and waterproof GORE-TEX® X-TRAFIT™ membrane
- Excellent, crease-free fit and good grip
- Special fit for women's hand
- Colour: Black
- Sizes (women): 6, 6½, 7, 7½, 8
- Sizes (men): 8/8½–12/12½

AirFlow 2 GLOVE

- A lightweight summer glove for temperatures above 20°C
- Pittards leather and AirTex® mesh
- Perforations between fingers
- Cordura® Stretch with foam underlay on fingers and knuckles for maximum comfort
- Unlined palm for better grip
- Material doubled at ball of thumb, edge of hand and little finger
- Stretch Cordura® thumb with Clarino® leather visor wiper
- Short neoprene cuff for better fit
- Leather strap to adjust width at wrists
- Colour: Black/Silver
- Sizes: 6/6½ – 12/12½

SILK UNDERGLOVE

- To be worn under motorcycling gloves in early spring/late autumn
- Pure silk
- Colour: Black
- Sizes: 7 – 11

**BMW MOTORRAD FUNCTIONAL CLOTHING.
TOTAL COMFORT, FOR HOURS ON END.**

SHORT FUNCTIONAL UNDERWEAR

- 95% Skinlife polyamide, 5% elastane
- T-shirt and shorts for summer wear
- Soft, cool and very pleasant to wear
- Breathable
- Antibacterial, even after repeated washing
- Fast-drying
- Motorcycling fit
- Colour: Dark Blue
- Sizes (unisex): S-XXL

PCM FUNCTIONAL UNDERSUIT 2

- Two-piece undersuit
- Mandarin collar made from fleecy thermal Powerstretch material
- Powerstretch outer
- Phase Change Material (schoeller® PCM™) for chest, upper arm, kidney area, thighs and knees
- Breathable, temperature-regulating and quick-drying

- Designed for temperatures between 5°C and 15°C
- Phase Change Material becomes soft when worn
- Also ideal for skiing, jogging, hiking, etc.
- Colour: Black with contrasting Green stitching
- Sizes: S–XXL

LONG FUNCTIONAL UNDERWEAR

- 95% Skinlife polyamide, 5% elastane
- Soft, cool and very pleasant to wear
- Breathable
- Antibacterial, even after repeated washing

- Three-quarter-length trousers
- Fast-drying
- Motorcycling fit
- Colour: Dark Blue
- Sizes (unisex): S–XXL

THERMAL UNDERWEAR

- 60% bioactive polyester, 34% Skinlife polyamide, 6% elastane
- Thicker knit for extra warmth in exposed areas
- Very pleasant to wear
- Breathable

- Antibacterial, even after repeated washing
- Thumb loops on cuffs
- Motorcycling fit
- Colour: Dark Blue/Black
- Sizes (unisex): S–XXL

AIRVANTAGE BODYWARMER

WINDBREAKER 3 JACKET

- High-quality polyester windbreaker material
- Three-layer laminate with functional PU membrane
- Windproof, water-resistant and breathable
- Slim-cut jacket
- Longer back section
- Warm fleece lining
- Full-length front zip
- Taped seams are flat and waterproof
- Two zipped pockets with mesh linings
- Also suitable for other leisure activities
- Colour: Black
- Sizes (women): XS–S
- Sizes (unisex): M–XXXL

- GORE-TEX® Performance Shell with Airvantage® insulation technology makes it extremely comfortable to wear
- Inflation/deflation of air chambers allows the level of insulation to be controlled
- Colour: Black
- Sizes: S–XXL

PCM 2 FUNCTION JACKET

- Phase Change Material (schoeller® PCM™): actively equalizes temperature differences for maximum comfort
- Jacket sleeves are detachable
- Colour: Black
- Sizes (unisex): S – XXXL
- Two zipped side pockets with mesh lining

DOUBLEFACE MEN'S FLEECE JACKET

New

- A functional fleece jacket with a high-quality double-face design
- Soft microfleece exterior for optimum insulation against cold
- High-performance polyester inner: breathable, temperature-regulating, moisture-wicking and fast-drying
- Windbreaker material with windproof membrane in chest area
- Soft cover for zip fastener in throat area
- Longer at back, sleeve cuffs longer over back of hand
- High, snug-fitting mandarin collar
- Colour: Bungee Cord
- Sizes: S – XXXL

DOUBLEFACE WOMEN'S FLEECE JACKET

- A functional fleece jacket with a high-quality double-face design
- Soft microfleece exterior for optimum insulation against cold
- High-performance polyester inner: breathable, temperature-regulating, moisture-wicking and fast-drying
- Windbreaker material with windproof membrane in chest area
- Soft cover for zip fastener in throat area
- Longer at back, sleeve cuffs longer over back of hand
- High, snug-fitting mandarin collar
- Two zipped side pockets with mesh lining
- Colour: Off White
- Sizes: XS – XXL

New

PREMIUM KIDNEY BELT

- Basic belt with three additional elements for different purposes
- Schoeller® Phase Change protects against cold
- WINDSTOPPER® membrane prevents heat loss
- Protector element
- Colour: Black
- Sizes (unisex): S–XL

BASIC KIDNEY BELT

- Made from high-quality stretch material (neoprene, fabric, velcro)
- Colour: Black
- Cut for a snug fit
- “BMW Motorrad” lettering at back
- Sizes (unisex): S–XL

HYDROSOCK FUNCTIONAL STOCKING

- A waterproof functional stocking
- Ergonomically designed for enduro/ off-road riding
- Three-layer laminate of bamboo fibre, polyester and Spandex, with a wind and waterproof C.A.R.E. climate membrane
- Warm, odour-neutralizing and moisture-regulating
- Reinforced sole
- Colour: Dark Grey
- Sizes: 39/40–47/48

SILVER FUNCTION SOCKS AND STOCKINGS

- Silver treatment gives lasting antimicrobial effect
- Padded shift area
- Knitted-in ventilation channels for improved air circulation
- Colour: Anthracite/Black
- Sizes (unisex): 37–48

SILK STORM HOOD

New

- Lightweight storm hood for summer use
- 100% high-grade silk, temperature-regulating
- Flat stitching prevents chafing

- Colour: Black
- Sizes: M and L

SUMMER STORM HOOD

New

- Designed for use in summer and late spring/early autumn
- With antimicrobial ultra-fresh® treatment
- No stitching

- Breathable and temperature-regulating
- Colour: Black
- Sizes: M and L

NECK WARMER

New

- High-quality microfleece with windbreaker membrane (three-layer laminate)
- Effective protection against wind for neck and upper chest
- Works well in combination with storm hoods
- Also suitable for skiing, jogging, hiking, etc.
- Colour: Black with Blue lining
- Sizes: S-L

WINDBREAKER STORM HOOD

New

- Suitable for low temperatures
- High-quality polyester fleece with windbreaker membrane (three-layer laminate)
- Powerstretch material in crown area
- Excellent protection against wind for neck and upper chest

- Flat stitching
- Breathable and temperature-regulating
- Colour: Black with Blue lining
- Sizes: S-L

FUNCTION MEN'S/WOMEN'S SHIRT

New

- High-performance blend of polyester and Cocona®
- Activated carbon fibre, excellent moisture-wicking, antibacterial and odour-neutralizing effect
- SPF 40+ UV protection
- Women's shirt slightly fitted, men's shirt straight-cut
- Colour: Bungee Cord
- Sizes (women): XS – XXL
- Sizes (men): S – XXXL

FUNCTION MEN'S/WOMEN'S T-SHIRT

New

- High-performance blend of polyester and Cocona®
- Activated carbon fibre, excellent moisture-wicking, antibacterial and odour-neutralizing effect
- SPF 40+ UV protection
- Women's shirt slightly fitted, men's shirt straight-cut
- Colours: Orange Pop (women), Orange (men)
- Sizes (women): XS – XXL
- Sizes (men): S – XXXL

CROSS LONG-SLEEVED JERSEY

- Made of lightweight, fast-drying polyester
- Mesh panels in neck, shoulder and underarm areas
- Designed for optimum fit with protector jacket, breast plate and neck brace
- Colour: Grey/Blue with Red highlights
- Sizes (men): S – XXXL

S2 BANDANA

- 100% cotton
- Intricate multicolour print
- Colour: Black
- Size: 80 x 80 cm

BMW MOTORRAD 2 BANDANA

- 100% cotton
- Intricate print with "BMW Motorrad" lettering
- Colour: Blue
- Size: 65 x 65 cm

GS 3 BANDANA

- 100% cotton
- Intricate print with "GS" lettering
- Colour: Grey/Blue
- Size: 60 x 60 cm

HERITAGE BANDANA

- 100% cotton
- Intricate retro-look print
- Colour: Grey with Bordeaux edge
- Size: 60 x 60 cm

BMW MOTORRAD EASY TUBE

- Soft, stretchable 100% polyester
- Can be worn in various ways (scarf, face protection, headband etc.)
- Colours: Red, Blue

GS EASY TUBE

- Stretchable material with no seams
- Can be worn in various ways (scarf, face protection, headband etc.)
- Colour: Olive

BRACES

- Can be attached to trousers by loops, buttons or clips
- Leather inlay in back area
- Steplessly adjustable
- Colour: Black

HYDRA DRINK POUCH

- Highly versatile drinking system
- Made from transparent, mould-resistant, odour-neutral polyurethane
- Reservoir features wide opening for easy filling and cleaning
- Tube plugs straight into reservoir; out-flow valve only allows liquid out with tube connected (so no risk of splashing when connecting the tube)
- Secure slide fastener stays tightly sealed even under considerable strain
- Angled push/pull mouthpiece can be opened with teeth
- Mouthpiece features a silicone easy-flow tip; when the mouthpiece is in the open position, riders can start the flow of liquid simply by biting gently on the mouthpiece
- Capacity: 2 litres

PRORAIN 3 RAIN SUIT

- One-piece wet-weather oversuit
- 100% nylon stretch laminate
- Long diagonal front zip and long side zips on legs for easy on/off
- Waterproof external pocket
- Packs up very small
- Heat-resistant Nomex® material around inner leg areas
- Anti-slip material in seat area
- Large reflective areas
- Colour: Yellow
- Sizes (unisex): S-XXXL

RAINLOCK 2 RAIN SUIT

- Two-piece wet-weather oversuit
- 2.5-layer 100% nylon laminate
- Jacket features built-in hood
- Long leg zip for easy on/off
- Two waterproof front pockets
- Non-slip material in seat area
- Packs up very small
- Heat-resistant Nomex® material around inner leg areas
- Colour: Red/Grey
- Sizes (unisex): S-XXXL

CHOOSE YOUR OWN CRUMPLE ZONES.

NP protectors from BMW Motorrad.

BMW Motorrad has worked with specialists in bio-mechanics, medicine and accident research to develop a new and even safer generation of protectors. Despite being extremely soft, flexible and inconspicuous, they provide a level of protection that's second to none, absorbing the impact by moulding themselves to vulnerable parts of the body and also providing significantly better coverage of the joints, combining active safety with luxurious comfort.

WHAT MAKES A GOOD PROTECTOR?

The lower the residual force transmitted to the body, the more effective the protector is. In other words, a good protector should absorb as much as possible of the impact energy, and then release it gradually so the level of force to which the wearer is subjected does not spike. NP protectors from BMW Motorrad do this between 200 and 700% more effectively than competitor products.

THE CE STANDARD. A CONSISTENT BENCHMARK FOR EVERYONE.

The CE standard is a European norm that applies to all joint and back protectors. It represents a good balance between protection, comfort and ergonomic considerations. Most protectors on the market are designed to withstand the maximum forces specified in the CE standard – however, this often means that in the much more common case of impacts with lower kinetic energy, the force of the collision is transmitted in its entirety to the wearer. BMW Motorrad protectors comfortably outperform the requirements of the CE standard: the residual force that reaches the body is between 10 and 12 kN for joint protectors and between 4 and 6 kN for back protectors, the lowest figures of any system on the market.

All protector products must by law be labelled with their size and the standard they comply with.

THE SLEEVELESS PROTECTOR JACKET FROM BMW MOTORRAD.

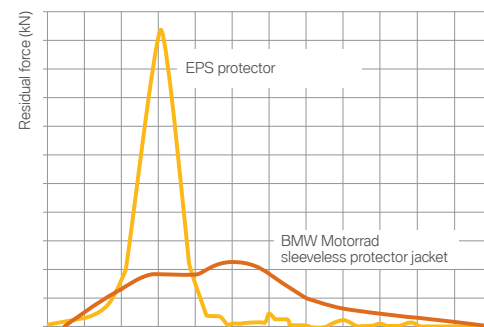

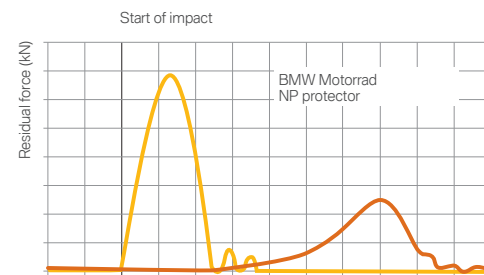

Back protectors must also indicate the degree of protection that they provide (performance level 1 or 2). The BMW Motorrad sleeveless protector jacket (see page 73 for details) and NP back protector are among the few products on the market that fulfil the much stricter performance level 2 criteria. The main measurement used to determine the fit of a back protector is the distance from hip to shoulder, and this too should appear on the protector. For example, for a "large" back protector, this distance should be at least 55 centimetres. However, comfort is not just about getting the right size, it's also about adjustability and tightness of fit. And comfort is an important safety feature in itself – because it allows riders to concentrate on the road, which is particularly important in critical situations.

AND ANOTHER THING:

The BMW Motorrad sleeveless protector jacket is the only certified back protector currently available that also protects the collarbone.

THE NECK BRACE SYSTEM.

Up until now, even the best motorcycling equipment has left the top of the back and neck unprotected. The neck brace system finally remedies this: developed by BMW Motorrad and KTM in conjunction with a team of experts in the fields of biomechanics, surgery and motorcycling accidents, the system minimizes the risk of damage around the neck, the cervical vertebrae and the collar bone. It is built of carbon, Kevlar®, glass-fibre reinforced plastic and foam padding, and closes securely around the neck like a collar. There is no loss of freedom of movement, and the rider becomes accustomed to the new equipment in a matter of minutes.

The new NP protectors spread the absorption of the impact over a longer period to avoid peaks in the residual force.

NECK BRACE SYSTEM

A revolution in protective clothing. The BMW Motorrad Neck Brace System significantly reduces the risk of injuries to the cervical vertebrae, yet at the same time is surprisingly light, and still offers riders considerable freedom of movement. It can be worn over a jacket or shirt, and is very easy to put on.

NECK BRACE SYSTEM

- Carbon Neck Brace System: outer layer made from a carbon/Kevlar® laminate, inner layer made from glass-fibre reinforced plastic, weighs just 780 grams
- Function Neck Brace System: made entirely out of glass-fibre reinforced plastic
- Foam-padded with removable fabric slipcase
- Suitable for use with all common helmets and motorcycling clothing
- Size-adjustable
- Does not restrict freedom of movement
- Suitable for track, off-road and everyday use
- Quick-release fastenings for easy on/off
- Colour: Anthracite/Carbon
- Size (children): S
Size (adults): M

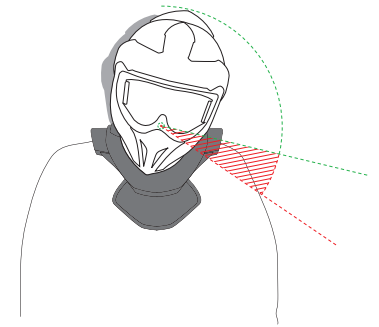

Hyperextension:
backwards bending of the neck
beyond its normal range of motion.

Hyperflexion:
forwards bending of the neck
beyond its normal range of motion.

Axial compression:
downward pressure on the neck
due to an impact on the helmet.

Lateral hyperflexion:
sideways bending of the neck
beyond its normal range of motion.

Danger zone 

Carbon Neck Brace System

The Neck Brace System stops dangerous movement of the neck in a controlled way, both in sports riding and on the road. The energy of an impact is effectively dissipated away from the neck to the upper body.

- The likelihood of whiplash injuries caused by bending of the neck beyond its normal range of motion to the front (hyperflexion), back (hyperextension) or side (lateral hyperflexion) is significantly reduced.
- The risk of injuries resulting from downward pressure on the neck due to an impact on the helmet (axial compression) or the head being forced backwards (posterior hypertranslation) is also minimized.

Function Neck Brace System

PROTECTOR JACKET 2

- Protector jacket for sports enduro riding
- DIN 1621, level 2 certification
- 100% polyurethane (PU) protector
- Polyamide/elastane shell
- Pre-shaped back protector
- Covers spinal column, shoulder blades and kidney area
- Exceptional shock absorption
- Polyurethane CE-certified NP protectors for shoulders and elbows provide maximum shock absorption
- PU protector material around the collar bone
- Removable inserts in chest area

- Removable, steplessly adjustable kidney belt
- Velcro straps to attach trousers
- Elasticated thumb loops
- Adjustable straps to fix elbow protectors in place
- Impact-absorbing EVA elements in upper arm area and sides of ribcage
- Wicks moisture away effectively and allows air to circulate freely
- “BMW Motorrad” lettering on the left-hand back section
- Colour: Black
- Sizes: S–XL

SLEEVELESS PROTECTOR JACKET

- 100% polyurethane (PU) protector
- Polyamide/elastane shell
- Anatomically pre-shaped back protector
- DIN 1621, level 2 certification
- Covers spinal column, shoulder blades and kidney area
- PU protector material around collarbone

- Exceptional shock absorption
- Allows air to circulate freely
- Steplessly adjustable shoulder straps, kidney belt and chest fastener
- "BMW Motorrad" lettering on kidney belt
- Colour: Black with Blue
- Sizes: S-XL

FUNCTION 2 RUCKSACK

- Capacity approx. 30 litres
- Made of polyester and polyamide
- Sturdy aluminium frame
- Highly water-resistant, with water-resistant zips on cover and back section
- Anatomically formed back section for maximum ventilation
- Adjustable, padded and ventilated shoulder straps
- Adjustable hip and chest straps
- Tensioning straps to compress the rucksack
- Top section can store a helmet
- Storage compartment in cover
- Two zipped exterior mesh pockets
- Printed “BMW Motorrad” lettering
- Also ideal for other leisure activities
- Colour: Dark Grey

MESSENGER BAG

- Functional shoulder bag made of polyester and polyamide
- Capacity approx. 10 litres
- Padded rear section
- Highly water-resistant
- Padded, adjustable shoulder strap
- Adjustable, removable hip strap
- Integrated laptop pocket
- Exterior zip
- Two pockets on inside of flap

LUGGAGE ROLL 2

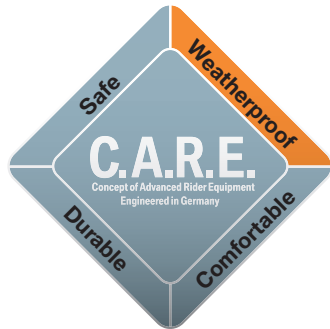

- Robust, waterproof luggage roll
- Capacity approx. 50 litres, 60 x 32 cm
- Sturdy, removable base
- Supplied with a variety of different-sized straps for attachment to motorcycle
- Adjustable shoulder and carry straps
- Diagonal zip for ease of access
- Reversible outer pocket with reflective material on one side
- Printed "BMW Motorrad" lettering
- Colour: Black/Silver

C.A.R.E. CONCEPT OF ADVANCED RIDER EQUIPMENT

INDUSTRY SAFETY STANDARDS ARE HIGH, BUT OURS ARE HIGHER.

Safety is of course our number one priority with the BMW Motorrad Rider Equipment range. Only the finest-quality materials are used, such as Keprosshield® or specially treated, tear-resistant leather, while we are constantly working to further develop existing technology and create wholly new fabrics. That way, we ensure each and every one of our products meets BMW Motorrad's exemplary safety standards – which are generally far more stringent than industry norms – and receives the C.A.R.E. stamp of approval.

FANTASTIC RIDING, WHATEVER THE WEATHER.

Products bearing the C.A.R.E. stamp make weather worries a thing of the past. Intelligently designed down to the very last detail, they feature windproof zips, gaiters and waterproof seams. Special materials keep rain out, while allowing body heat and moisture to escape, and some of them even actively regulate body temperature. Together, they ensure the optimum riding conditions whatever the weather. Because a comfortable rider is a safer rider.

LOOK GREAT, FEEL EVEN BETTER.

It's absolutely essential that motorcyclists aren't distracted by poorly-fitting equipment, which is why all BMW Motorrad products are designed to offer the ultimate in comfort. The materials used are of the highest quality, being both tough and offering freedom of movement, and most of our gloves feature fingers that are curved forwards and specially stitched to minimize pressure on the hand. Similarly, the new NP protectors are soft and flexible yet deliver outstanding safety performance.

QUALITY THAT LASTS AND LASTS.

BMW Motorrad Rider Equipment is like a trusty riding companion that can be relied on for years. Over time, the products become almost as unique as the rider that wears them, with their exceptional durability a result of the quality of the materials and manufacturing processes employed. Every single fabric and fibre undergoes extensive testing in a range of realistic conditions, while each individual component is subjected to the most thorough practical and virtual testing and analysis imaginable.

THE A – Z OF RIDER EQUIPMENT

AirTex®

This resistant, net-like Dynafil structure allows air to flow freely, keeping you cool even at higher temperatures. It is extremely light, yet offers all the safety you'd expect from a motorcycling jacket, and is ideal for hot-weather riding.

Azo dyes

These may not be used in coloured outer materials since they can break down into carcinogenic amines.

Breathability

Technically defined as resistance to evaporating heat transfer (RET). The lower the RET, the more permeable the material is to air.

Carbon fibre

Heat-resistant chemical fibre, lighter than glass fibre. Characterized by high strength and rigidity.

C.A.R.E. climate membrane

A functional membrane that meets C.A.R.E. standards and is breathable, waterproof and windproof.

c_change™

Also combined with the bionic c_change™ climate membrane in a three-layer laminate. The intelligent c_change™ membrane adapts the size of its pores according to the exterior temperature, thus allowing the skin to breathe in hot weather, and locking in heat on colder days.

CE test mark

The CE (Communauté Européenne) mark indicates that the product complies with European Union safety directives.

coldblack®

Treatment for dark material that reflects the sunlight and protects against UV rays, keeping suits cooler for longer.

Cordura® 500/700

Nylon yarn consisting of 100% polyamide. The manufacturing process involves respinning and weaving the cut polyamide fibres. Has a melting point of 210°C. Cordura® 700 is even more tear-resistant.

Design

The characteristics of BMW design include the use of classic shapes and colours. The guiding principle is "Form follows function."

DuPont Coolmax®

DuPont Coolmax® consists of hollow fibres which transport humidity to the outside very quickly by capillary action, making the material dry 50% faster than cotton.

Dynafil

A highly tear-resistant polyamide yarn that is even more robust than Cordura® 500/700 and resistant to high temperatures.

Dynatec™

Fabric made of Dynafil. Tear-resistant and extremely robust, with a melting point of 290°C.

Expanding pleats

The upper material is sewn onto the stretch fabric in a corrugated form. This allows the compound to stretch, making the tear-resistant outer material even safer.

Glass-fibre reinforced plastic (GFRP)/ carbon-fibre reinforced plastic (CFRP)

The individual fibres (aramid, carbon, glass fibre) can be mixed in varying proportions as required. By changing the orientation and position of the fibres, different characteristics can be achieved – for example low weight, high strength, high rigidity, low heat expansion and good insulating properties.

GORE-TEX®

A membrane made of teflon (polytetrafluorethylene). Countless microscopic pores prevent the penetration of large water droplets while allowing the much smaller water vapour molecules to pass through. The branch-like structure of the membrane means that it is also windproof.

GORE-TEX® X-TRAFIT™

GORE-TEX® X-TRAFIT™ is a three-layer construction employed in motorcycling gloves. It is windproof, waterproof and breathable, with the layers being glued or laminated together. The lining of the gloves is bonded to the membrane, which in turn is bonded to the leather, ensuring they are easy to put on and take off (even when wet) and offer first-rate grip.

Hydrophobic treatment

A treatment which renders leather water-resistant. BMW uses the vat immersion technique, with 3M Scotchguard™ as the active agent. The best results are obtained when only the leather fibres are encapsulated and the pores are left open, thereby maintaining breathability.

Integral helmet

A helmet that encloses the head completely.

Jet helmet

An open-face helmet with no chinguard or visor.

Kangaroo leather

Finer, more closely woven fibres and a tighter structure make this leather even more durable than cowhide.

Keproshield™

Highly protective material made of Kevlar®, Dynatec™ and cotton, bonded together with the c_change™ bionic membrane as a three-layer laminate, and treated with coldblack® reflective technology.

Keprotect®

A blend of Kevlar® and PA fibres which enhances Kevlar's® already excellent stretchability and abrasion resistance. Used to reinforce those areas most at risk in a fall, such as the elbows, shoulders, knees and thumbs.

Laminate

A layered structure of various materials created by thermal adhesion (the adhesive is usually applied in spots), and particularly suited for use with all-weather membranes. Can also take the form of a lining laminate or three-ply laminate, and does not always need to be thermally attached to the outer material.

Leather

Because all leathers are not equal, we only use the very best. We use only the finest leathers from cows reared in the EU for our jackets, boots and gloves, with a minimum thickness of at least 1.2 mm for our suits, and often much more. As a result, they offer exceptional abrasion resistance.

Motorcycle-specific cut

This pattern takes account of the body's contours in the riding position. The tops of the sleeves are further forwards, the sleeves and legs are angled, and there are numerous other special design details.

Nappa leather

The upper surface of the hide. Smooth and slightly shiny, worked to a soft leather with a fine grain.

Nickel-free accessories

All BMW Motorrad buttons and zips are nickel-free to protect the skin.

Nomex®

A heat-resistant material made of fire-retardant aramid fibres.

Nubuck leather

A highly breathable leather with a slightly roughened surface, resulting in a velvety feel.

Off-road helmet

A helmet with a chin guard and sunshield but no visor.

PCP/CP

Pentachlorophenol (PCP) is banned under the German prohibited chemicals order of 14 October 1993, though it may be used in concentrations of up to 5 mg/kg in leather processing.

ProFoam

A viscoelastic foam which hardens on impact, providing excellent shock absorption at all temperatures.

ProSafe

An integral polyurethane foam with an open-cell structure and a closed-cell outer skin that resists weathering and is used in protectors.

Safety, active and passive

Active safety measures are designed to prevent accidents, for example by using reflective material for good visibility. Passive safety features aim to minimize the effects of an accident, for instance by employing impact-resistant protectors and outer materials.

Schoeller® PCM™

Derived from space research, this material features special paraffin capsules that allow it to store heat when warm and release it when the temperature drops. It is thus able to minimize fluctuations in body temperature, keeping the rider comfortable. The material is at its most effective between temperatures of 5°C and 25°C.

Serafil

Highly tear-resistant safety yarn used in all BMW Motorrad motorcycle suits.

Silver function

A fabric treated with silver via an ionizing process that has a long-term antibacterial effect, minimizing odour and moderating body temperature. The material has anti-static properties and wicks moisture away particularly effectively.

Stormcuff®

A sleeve inlay which forms a waterproof closure around the wrist.

TFL® Cool System

Cool technology is used in dark leather and fabric garments. Thanks to a special manufacturing process, sunlight is reflected from the dark surface of the leather or fabric in the same way as from a light surface, making the outer material much less likely to overheat.

Z-liner

Here, the membrane is like a lining "suspended" between the outer material and the lining itself.

GORE-TEX® is a registered trademark of W.L. Gore & Associates. Schoeller® PCM™ is a registered trademark of Schoeller & Frisby Technologies. DuPont Coolmax®, Cordura®, Nomex® and Kevlar® are registered trademarks of DuPont.

	XXL	112–119	50	56/58
	XXXL	120–126	52/54	60/62
BACK PROTECTORS	Size	Torso length	Height	
	S	46–50	160–172	
	M	51–54	172–184	
	L	55–59	184–196	
	XL	55–59	184–196*	

As the ratio of torso length to overall height can vary greatly from person to person, and the build of the individual also significantly affects fit, this table should be considered as providing guidance only.

* With heavier build.

All measurements are in centimetres.

The figures shown in this table are the body measurements used as the basis for sizing products in the current BMW Motorrad Rider Equipment range. The table should therefore help customers to choose the appropriate size.

SEE HOW YOU MEASURE UP

It's essential that a motorcycling suit should fit properly. If it's uncomfortably tight, it can affect concentration while riding, and the same goes if it's flapping loose.

Either way, it's an irritation that will take your mind off the road, and so compromise your safety. Jackets and trousers also have to sit right on the wearer. Sleeves and trouser legs should never ride up, because if they do, it's not just a safety issue – it also means you're not properly protected against the elements.

That's why the cut of all BMW Motorrad suits is specially designed for motorcycling use, and why they all feature a wealth of adjustments, expandable sections and clever details.

However, the most important factor in ensuring a glove-like fit is still making sure that you get the right size. BMW Motorrad knows that riders come in all different body shapes, and so its suits are available in a choice of over 40 different sizes. To find the one that's right for you, grab your tape measure and follow these simple instructions.

Ⓐ Height

Stand barefoot with your back to a door frame. Place a book on your head and use it to make a mark on the door frame. Measure the height from the floor to this mark.

Ⓑ Chest

Take this measurement while wearing a shirt or lightweight pullover. Pass the tape measure under your arms, and take the measurement around the broadest part of the chest and over the shoulder blades.

Ⓒ Waist

Measure around the shirt, just above the top of your trousers. Please ensure you are in a relaxed and natural position, and do not hold in your stomach – that way you'll ensure the trousers later sit comfortably.

Ⓓ Hips

Measure the distance around the body over the hips and the fullest part of the backside.

Ⓔ Outside leg

Measure the distance down the outside of your leg, from the waist of your trousers to the sole of your foot.

Ⓕ Inside leg

Measure the distance down the inside of your leg, from the crotch seam to the sole of your foot.

SYMBOLS

c_change™

GORE-TEX®

GORE-TEX® Armacor™

A material with excellent tensile strength and abrasion resistance, capable of withstanding extreme temperatures thanks to the combination of Kevlar® and Cordura®.

Cordura®

Dynatec™

Keprosshield™

AirTex®

WINDSTOPPER® laminate

Offers a high level of freedom of movement, and excellent protection against wind and rain.

3M Thinsulate™

A thin layer of this lightweight material is enough to provide excellent thermal insulation.

coldblack®/TFL Cool technology

Reflective material

Nanosphere

A treatment to prevent the build-up of dirt and improve washability.

Leather

Kangaroo leather

Stingray leather

Hydrophobic treatment

Sun

Warm weather.

Cold

Cold weather.

Windproof

Waterproof

Waterproof pocket

Special women's cut
